

THE DUDE Course Outline

Price: 350 USD

This class will teach you everything from setting up The Dude for the first time to the more advanced topics that make The Dude an invaluable resource. At the end of the class, each student should feel comfortable installing and administering The Dude on their own network. Here are some of the things that you will learn in this class:

- Installing and running The Dude
- Running The Dude in the Cloud
- Building your network maps
- Managing the database
- Use Agents
- Building Charts
- Working with SNMP
- Building Probes
- Building tools
- Getting Notifications
- Using the Syslog
- and much more...
